ARCTIC | LIGHTS

The Arctic collection draws inspiration from icy landscapes, glaciers, and frozen moments. The lights are cut from solid Dalle de verre casted glass, the depth and density of which is reminiscent of frozen water. The irregular broken edges and raw cut lines give the glass a lively, almost pulsating structure. When light hits these edges, it captures the surfaces, reflecting and refracting to bring the lights to life and reveal their brilliance. Each light. This poetic concept is available as a floor and wall lamp.

Important Note: The components of this lighting fixture comply with applicable EU directives. Export to non-EU countries may require additional certifications; the buyer is responsible for ensuring compliance. Installation must be performed exclusively by a qualified electrician in accordance with local regulations and regional safety standards. The manufacturer assumes no liability for damages resulting from improper installation, non-compliance with local regulations, or unauthorized modifications to the electrical components.
